FRANCE

PROFILE

Software architect, Product manager.

Throughout my career, I had the opportunity to get a deep understanding of software development, IT architecture and team building. These skills enabled me to work for a wide range of industries (both in France and internationally) such as bank/finance, media, luxury, real-estate and startup ventures.

My goal is to help organisations build a resilient, agile and efficient information system.

EXPERIENCE

Apr 2018 – Present

Chief Technology Officer at Agence Française de Développement

Agence Française de Développement (AFD) Group is a public institution that implements France's policy in the areas of development and international solidarity. Development is one of the country's three pillars for external action, along with diplomacy and defence. Our mission is to contribute to the economic, social, and environmental progress of low and middle-income countries.

As Group CTO, I am leading the infrastructure team providing global enterprise-wide data center, server, storage, networking, virtualisation, security, virtual desktop, converged voice and video, mobile/BYOD services to our users and partners.

Teams and org:

Managing 6 managers, 52 people. 10+ M€ budget. 25 technical projects to change complex infrastructures serving over 3500 users in 100 offices over 80 countries.

Responsibilities:

Business activity monitoring, service delivery of infrastructures, assets management, security engineering & administration.

Successful implementations:

Setting up middle management org, ITIL Service Operation processes (request, incident, problems), remote site deployment team and process during Covid restrictions time, IT business activity reporting, Cloud offloading infrastructure strategy, CI/CD (Gitlab, Vault, GoCD, Nexus, Ansible)

May 2005 – Sept 2017

Software architect / Owner at TRADEMEDiA

TRADEMEDIa was started in Dubai Internet City in 2005 following our move to the UAE. For 15 years, I've been managing both the business side of the company and the numerous tech projects we've built for our customers.

Highlights:

Project management and operation management of a regional real estate portal (caza.ae)

- Branding: identity, web design, corp. material
- Back-end development: Laravel (php), MongoDB, Python
- Front-end: Html, Css, Javascript, React, Vue.js
- Hosting: VPS (Linode), AWS

Project management and operation management of a regional B2B marketplace (industrialsdirectory.com).

- Stack: MongoDB, Python, Php, AWS S3+CloudFront, Node.js, Ubuntu VPS, Nginx.

Corporate intranet: centralised administration and support

- Data/directory replication strategy
- Software development: reporting automation, intranet components (portlets)
- Remote hardware migration scripting and packaging

SKILLS

- Team building & IT strategy
- Product management & Project management
- Software architecture
- Dev stacks: Python, Laravel (php), Node.js, Next.js
- Front: Nginx, CSS frameworks
- Backend: MongoDB, Postgres
- Middleware & DevOps: REST API, Redis, GraphQL, Git, Ansible
- Infrastructure & System: Linux sysadmin, AWS, Terraform

EDUCATION

Sept 1997

Associate of Science (A.S.), Theoretical and Mathematical Physics at Université Denis Diderot (Paris VII)
